**Industry Veterans Root New Brokerage Firm in Dallas.**

Dallas, Texas (December 11, 2007) – Today, Bridge Insurance Partners, a national commercial property and casualty agency, announced the launch of its first operating office in Dallas.

Industry veteran and Managing Principal, Jeff Turner, spear-headed the campaign to open shop in Dallas after leading a local office of a Ft. Worth- based firm, where he served as Managing Director. Executives of the same, Tommy Saxon and Ryan Perry, join Turner in the industry-supported project. This is the second business venture for the Turner-Saxon team, who have been acquainted since their days in junior high. Industry sales success, Perry joins the duo to assist in business implementation. These veterans combine their expertise to establish a national brokerage practice that will focus on delivering comprehensive coverage packages to middle market clients. Bridge Insurance Partners is distinguished in the marketplace by its ability to deliver a unique service model and cost structure that utilizes strategic business partnerships. Bridge Insurance Partners operates on a model that will realize triple-digit growth in the next thirty-six months, expanding the Dallas office south into Texas and across the nation in the year to follow.

“The Bridge model has been in development for the last eleven years,” said Jeff Turner, Managing Principal. “Its premise of forming mutually beneficial relationships with our clients and agents will allow our teams to serve clients in a superior manner.”

Bridge Insurance Partners provides property and casualty coverage to middle market firms operating in the United States. The founding office, located at Park Central, houses 8 professionals and 3 principals. An expansion into new and larger office space, that will accommodate the first phase of the growth model, is slated for January 9, 2008.
